25X1

1. An aircraft parts factory is situated at Swidnik (S 52/R 18), two kilometers from Kudlin. The factory merely produces aircraft parts and does not assemble planes.
2. The factory consists of seven workshops, 100 meters by 40 meters. The machinery is German and Russian. The factory receives its electric power from Lublin. It employs 2,350 workers in one shift. The food is good and salaries range from 900 to 1,750 zloty per month. The workers live in new apartments which were being constructed rapidly.
3. In the direction of Irenka, forests were being cleared for an airfield. Underground tunnels were already completed at this time and will probably be used for aircraft and supplies. All work was being done under Soviet supervision. Twice a week Soviet supervisors arrived on a Soviet plane to control and direct the work.
